U.S. Environmental Protection Agency, Region III  
1650 Arch Street  
Philadelphia, Pennsylvania 19103-2029

**Re: Safety Light Corporation Superfund Site, Bloomsburg, Pennsylvania**

Dear Mr. Steinmetz:

This is the response ("Response") of The Goodyear Tire & Rubber Company ("Goodyear") to U.S. EPA Region III's Required Submission of Information ("Information Request") pursuant to Section 104(e) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA") concerning the above-captioned Superfund Site ("Site"), which Goodyear received on September 4, 2012. The Information Request specified a deadline for responding of October 4, 2012. In September 2012, U.S. EPA Region III agreed to a 30-day extension of that deadline, until November 5, 2012.

This Response is not intended and should not be construed as an admission, acceptance or acknowledgement of any fault, responsibility or liability, or as a waiver of any privilege, right or defense by Goodyear or any of its officers, employees, agents or representatives with respect to any documents or any claim or any other matter, act, thing or fact set forth in, or which is the subject of, or based on your Information Request, or which in any other way relate to the Site.

Goodyear reserves all rights to object on any basis or ground to the use, in whole or in any part, of any documents or information submitted with this Response in any proceeding or for any purpose. Goodyear reserves the right to amend, modify or supplement this Response.

Goodyear objects to the instructions and definitions in EPA's Information Request on the grounds that they are over-broad, burdensome, unlimited in scope and time, and not reasonably related to the legitimate purpose of inquiry permitted in the Comprehensive Environmental Response, Compensation and Liability Act. Goodyear makes no response for independent contractors, dealers, franchisees or any other entity that operates independently of The Goodyear Tire & Rubber Company.

**INFORMATION REQUEST QUESTIONS, OBJECTIONS AND RESPONSES**

1. Describe in detail any and all business relationship(s) between Goodyear and Safety Light or its affiliates.

**Response:**

Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, Goodyear appears to have engaged in the following business transactions with United States Radium Corporation ("USRC"):

- One transaction under Purchase Order No. 474936 for a shipment in February of 1967 of one carbon 14 source from Goodyear's facility located in Akron, Ohio, to USRC's facility located in Bloomsburg, Pennsylvania.
  - One or two transactions under Purchase Order No. 35905 for a shipment in September of 1966 of two krypton 85 beta sources from Goodyear's facility located in Point Pleasant, West Virginia, to USRC's facility located in Bloomsburg, Pennsylvania, and for a return in March of 1967 of two krypton 85 beta sources from Goodyear's facility located in Point Pleasant, West Virginia, to USRC's facility located in Bloomsburg, Pennsylvania. Because available documents from both time periods reference Purchase Order No. 35905 and reflect similar descriptions of the sources transported or returned to USRC, Goodyear believes those documents may reference a single shipment of the same two krypton 85 beta sources.
2. Did Goodyear ever send, transport or ship, or otherwise arrange for transportation or shipment of, radioactive materials or items containing radionuclides to the Site?

**Response:**

Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, Goodyear appears to have sent, transported or shipped, or otherwise arranged for transportation or shipment of a carbon 14 source and krypton 85 beta sources to the Site.

3. Did Goodyear ever send, transport or ship, or otherwise arrange for transportation or shipment of, radioactive materials or items containing radionuclides to Safety Light Corporation, U.S. Radium Corporation, Lime Ridge Industries, Inc., USR Industries, Inc., USR Metals, Inc., Metreal Corporation, Isolite Corporation, U.S. Natural Resources, Inc., USR Chemical Products, Inc., USR Lighting Products, Inc., UNA TCO Funding Corporation or Shield Source Incorporated?

**Response:**

Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, Goodyear appears to have sent, transported or shipped, or otherwise arranged for transportation or shipment of a carbon 14 source and krypton 85 beta sources to USRC.

4. If you answered "yes" to Question 2 or Question 3, please respond to the following:
  - a. Provide the time period during which each such transaction occurred.

**Response:**

Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, the transactions referenced in Goodyear's Responses to Questions 2 and 3 appear to have occurred during the following timeframe(s):

- One transaction in February of 1967.
  - One or two transactions in September of 1966 and/or March of 1967. Because available documents from both time periods reference Purchase Order No. 35905 and reflect similar descriptions of the sources involved in the transaction(s), Goodyear believes those documents may reference a single shipment.
- b. Provide the purpose or reason for each such transaction.

**Response:**

Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, Goodyear appears to have engaged in the transactions referenced in Goodyear's Responses to Questions 2 and 3 for the return and/or disposal of a carbon 14 source and krypton 85 beta sources.

- c. for each and every transaction, provide:
  - i. the entity to which you sent radioactive materials or items containing radionuclides (i.e., Safety Light Corporation, U.S. Radium Corporation, Lime Ridge Industries, Inc., USR Industries, Inc., USR Metals, Inc., Metreal Corporation, Isolite Corporation, U.S. Natural Resources, Inc., USR Chemical Products, Inc., USR Lighting Products, Inc., UNATCO Funding Corporation and Shield Source Incorporated);

**Response:**

Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, the carbon 14 source and krypton 85 beta sources referenced in Goodyear's Responses to Questions 2 and 3 appear to have been sent to USRC.

- ii. a detailed description of each radioactive material or item or type of item(s) sent and the amount of radionuclides contained within each such material or item(s);

**Response:**

Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, one transaction referenced in Goodyear's Responses to Questions 2 and 3 involved a carbon 14 source with an unspecified amount of radionuclides contained within that source, and one or two transaction(s) referenced in Goodyear's Responses to Questions 2 and 3 involved two (2) krypton 85 beta sources, each of which contained approximately five (5) millicuries of krypton 85.

- iii. the method used to send or transport such radioactive materials or items to the Site (e.g., hauler, U.S. mail, etc.);

**Response:**

Goodyear does not have any information regarding the method used to send or transport to the Site the materials or items referenced in Goodyear's Responses to Questions 2 and 3.

- iv. all documents relating to the transaction, including but not limited to invoices, and correspondence regarding the type, amount, and transportation/disposal of the radioactive material or item(s) containing radionuclides to the Site;

**Response:**

Documents relating to the transactions referenced in Goodyear's Responses to Questions 2 and 3 were provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, and are attached hereto. Goodyear has not located any other documents relating to the transactions.

- v. the name, title, areas of responsibility, current (or most recent) addresses, and telephone numbers of other persons or parties that have documentation or information pertaining to the transportation/disposal of

radioactive material or item(s) containing radionuclides to the Site, and/or to the entities identified in Question 3.

**Response:**

**Goodyear has not identified any other persons or parties that have documentation or information pertaining to the transportation or disposal of material or item(s) to the Site referenced in Goodyear's Responses to Questions 2 and 3 or to the entities identified in Question 3.**

- d. If your response to the above includes the contracting of a hauler or transporter to transport and/or dispose of radioactive material or item(s) containing radionuclides, explain these arrangements and provide all documentation relating to those transactions. In addition, please identify:
- i. the persons with whom you, or other such persons, made such arrangements;
  - ii. every date on which such arrangements took place;
  - iii. for each transaction, the nature and quantity of material, including its chemical content, characteristics, physical state (i.e., liquid, solid), and the process for which the substance was used or the process that generated the substance;
  - iv. the persons who selected the Site as the place at which materials were disposed or treated;
  - v. the names of employees, officers, owners, and agents for each transporter.

**Response:**

**Goodyear does not have any information concerning the contracting of a hauler or transporter to transport and/or dispose of material or item(s) referenced in Goodyear's Responses to Questions 2 and 3, or any arrangements related thereto.**

- e. For each and every instance in which you/your company arranged for radioactive material to the Site, identify:
- i. the quantity (number of loads, gallons, drums) of materials that were used, treated, transported, disposed, or otherwise handled by you;

**Response:**

**Pursuant to documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, attached hereto, Goodyear appears to have engaged in the following arrangements for material to the Site:**

- One shipment of one carbon 14 source.

- One or two shipments of two krypton 85 beta sources. Because available documents from both time periods reference the same Purchase Order No. 35905 and reflect similar descriptions of the sources transported or returned to the Site, Goodyear believes those documents may reference a single shipment of the same two krypton 85 beta sources.
- ii. any billing information and documents (invoices, trip tickets, manifests) in your possession regarding arrangements made with your company to generate, treat, store, transport, and/or ship materials to the Site; and

**Response:**

Documents relating to arrangements made with Goodyear to generate, treat, store, transport, and/or ship materials to the Site were provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, and are attached hereto. Goodyear has not located any other documents relating to the transactions.

- iii. the names, titles, and areas of responsibility of any persons, including all Goodyear employees, present and former, who were involved in or would have knowledge of such arrangements.

**Response:**

Documents provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request appear to reflect the following names of present or former Goodyear employees who may have been involved in or may have had knowledge of arrangements made with Goodyear to generate, treat, store, transport, and/or ship materials to the Site:

Mr. H. Franklin  
Instrument Laboratory,  
Engineering Division – Plant C  
The Goodyear Tire & Rubber Company  
Akron, Ohio 44316

R. E. Wolf  
The Goodyear Tire & Rubber Company  
Point Pleasant Chemical Plant  
Point Pleasant, West Virginia 25550

- f. Describe any permits or applications and any correspondence between Goodyear and any regulatory agencies regarding materials transported to or disposed of at the Site.

**Response:**

**Goodyear does not have any information concerning any permits or applications or any correspondence between Goodyear and any regulatory agencies regarding materials transported to or disposed of at the Site.**

- g. Provide copies of any correspondence between Goodyear and any third party regarding materials transported to or disposed of at the Site.

**Response:**

**Documents relating to any correspondence between Goodyear and any other party regarding materials transported to or disposed of at the Site were provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, and are attached hereto. Goodyear has not located any other documents relating to those arrangements.**

- h. Provide the identity of, and copies of any documents relating to, any other person who generated, treated, stored, transported, or disposed, or who arranged for the treatment, storage, disposal, or transportation of such materials to the Site.

**Response:**

**Goodyear does not have any information concerning any other person who generated, treated, stored, transported, or disposed, or who arranged for the treatment, storage, disposal, or transportation of such materials to the Site.**

- i. Provide the identities of all predecessors-in-interest who, during the period 1945 to the present, transported to or stored, treated, or otherwise disposed of any materials at the Site and describe in detail the nature of your predecessor-in-interest's business.

**Response:**

**Goodyear does not have any information concerning any predecessors-in-interest who, during the period 1945 to the present, transported to or stored, treated, or otherwise disposed of any materials at the Site.**

- 5. Did GT&R ever generate other waste(s), not described in response to Questions 2 or 3, above, that were disposed of or reclaimed by U.S. Radium, Lime Ridge Industries, USR Industries, USR Metals, Metreal or Isolite at the Site? If yes, please provide a detailed description of such other waste(s) and any and all related documentation.

**Response:**

**Goodyear does not have any information indicating that Goodyear ever generated other waste(s), not described in response to Questions 2 or 3, above, that were disposed of or reclaimed by U.S. Radium, Lime Ridge Industries, USR Industries, USR Metals, Metreal or Isolite at the Site.**

6. For each question above, provide the name, title, area of responsibility, current address, and telephone number of all persons consulted in preparation of the answers, or who supplied documents reviewed or relied upon in the course of preparing your answers,

**Response:**

**Goodyear objects to this question on the grounds and to the extent that it is overly broad and burdensome and seeks information that is governed and protected by the attorney-client privilege, attorney work product doctrine, or other privilege. Subject to and without waiving the foregoing objections, the following persons were consulted in preparation of this Response:**

**Steven C. Bordenkircher  
Senior Legal Counsel  
The Goodyear Tire & Rubber Company  
1144 East Market Street  
Akron, OH 44316  
330-796-2121**

7. If you have reason to believe there may be persons able to provide more detailed or complete responses to any question contained herein, or who may be able to provide additional responsive documents, provide the names, titles, areas of responsibility, current addresses, and telephone numbers of such persons as well as additional information or documents they may have.

**Response:**

**Goodyear does not have any information concerning any other persons who may be able to provide more detailed or complete responses to any question contained in the Information Request, or who may be able to provide additional responsive documents.**

8. If you have any other information about other parties who may have information that may assist the Agency in its investigation of the Site, or who may be responsible for the generation of: transportation to, or release of contamination at the Site, please provide such information. The information you provide in response to this request should include the party's name, address, type of business, and the reasons why you believe the party may have contributed to the contamination at the Site or may have information regarding the Site.

**Response:**

**Goodyear does not have any information concerning other parties who may have information that may assist the Agency in its investigation of the Site, or who may be responsible for the generation of: transportation to, or release of contamination at the Site.**

9. If any of the documents solicited in this information request are no longer available, please indicate the reason why they are no longer available. If pertinent records or documents were destroyed or are missing, provide us with the following:
- a. Your document retention policy;
  - b. A description or how the records were destroyed (burned, archived, trashed, etc.) and the approximate date of destruction;
  - c. A description of the type of information that would have been contained in the documents; and
  - d. The name, job title and most current address known by you of the person(s) who would have produced these documents; the person(s) who would have been responsible for the retention of these documents; and the person( s) who would have been responsible for the destruction of these documents.

**Response:**

**Documents solicited in the Information Request were provided by U.S. EPA to Goodyear in Enclosure 4 of the Information Request, and are attached hereto. Goodyear has not located any other documents containing any information pertaining to the matters referenced in the Information Request, and Goodyear does not have any information regarding: whether Goodyear at any time possessed those or any other documents that would have been solicited in the Information Request; whether or how such documents would have been destroyed; what information may have been contained in such documents; or the name, job title and address of the person(s) who would have produced such documents or that would have been responsible for the destruction of such documents. Goodyear's current document retention policy specifies a retention period for records relating to the disposal of radioactive materials of thirty years following the date of generation.**

November 30, 1965

Dict. 11/29

Mr. H. Franklin  
Instrument Laboratory  
Engineering Division - Plant C  
The Goodyear Tire & Rubber Company  
Akron, Ohio 44316

Dear Mr. Franklin:

In response to your letter of November 25 regarding your leaking carbon II source which requires repair, note that the unit can be returned to our Laboratory at the following address:

U. S. Radium Corporation  
1150 Old Warwick Road  
Bloomsburg, Pennsylvania 17815

Attention: Mr. David Berr

Upon receipt and inspection of the source at that point, we shall be pleased to contact you and provide firm advice concerning the type of repair needed as well as the cost involved. We assume that the source in question is the type which we have earlier prepared for you in several instances, involving deposition of a carbon II salt with a varnish binder. The deposits being finally sealed into the metal housing by means of a pair of thin Mylar windows at the face. If so, unless other radiol damage has occurred, it is likely that the rather delicate windows have been ruptured to permit leakage.

We shall be pleased to take care of this requirement.

Very truly yours,

UNITED STATES RADIUM CORPORATION

Attention: R. E. Wolf

Ref: Purchase Order No. 35905

Gentlemen:

We have recently received at our Bloomsburg, Pennsylvania laboratory, the 2 krypton 85 beta sources which had been forwarded for our scrap disposal under your shipping ticket Z-4257. In accordance with your instructions referencing purchase order 35905, we have now completed disposal of the units, and are invoicing the applicable charge of \$25 per lot against this order.

We trust that our handling of the transaction in this way takes care of your requirements.

Very truly yours,

**After printing this label:**

1. Use the 'Print' button on this page to print your label to your laser or inkjet printer.
2. Fold the printed page along the horizontal line.
3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

**Warning:** Use only the printed original label for shipping. Using a photocopy of this label for shipping purposes is fraudulent and could result in additional billing charges, along with the cancellation of your FedEx account number. Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on [fedex.com](http://fedex.com). FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation, unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim. Limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, profit, attorney's fees, costs, and other forms of damage whether direct, incidental, consequential, or special is limited to the greater of \$100 or the authorized declared value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$1,000, e.g. jewelry, precious metals, negotiable instruments and other items listed in our Service Guide. Written claims must be filed within strict time limits, see current FedEx Service Guide.
